1 \$401,000 Sacramento County SACOG 03-Sacramento	In Sacramento County. <u>Outcome/Output:</u> Improve safety, operation and effective capacity of the Florin Road signal system. Reduce vehicle stops and emissions and allow for Transit Signal Priority. Reduce travel times by 4 minutes (21%) and produce an annual delay savings of 2.0 million dollars.  Total Construction Cost: \$501,000.	03-0L1974  \$401,000 CONST	2007-08 104-6064 TLSP	\$401,000
2 \$1,489,000 City of Walnut Creek MTC 04-Contra Costa	In Walnut Creek. <u>Outcome/Output:</u> Implementation of adaptive signal technology along the corridor requires signal system upgrade that will result in substantial decreases in congestion costs during normal daily operation and particularly in response to incidents and special events. The expected reduction in travel time and stops will reduce the vehicle emissions along the corridor. The number of accidents is expected to be reduced, which will reduce community costs associated with accidents. This project will showcase the benefits of adaptive technology on a major urban arterial, with results that are of national interest.  Total Construction Cost: \$1,750,000.	04-074604L  \$1,489,000 CONST	2007-08 104-6064 TLSP	\$1,489,000
3 \$3,215,000 City of Los Angeles LACMTA 07-Los Angeles	In the city of Los Angeles. <u>Outcome/Output:</u> The 170 intersection ATCS-Echo Park/Silver Lake Project will provide fully traffic responsive signal control based on real time traffic conditions. ATCS will be implemented using new software, replacing obsolete traffic signal controllers, changeable message signs and additional pavement traffic detectors at intersections currently on line as part of the City of Los Angeles' ATSAC system.  (Partial allocation to complete accelerated element of overall project. Agency will request remaining programmed amount at a later date.)  Total Overall Construction Cost: \$6,059,000.	07-4U4204L  \$6,058,000 CONST	2007-08 104-6064 TLSP	\$3,215,000 (Partial)

1 \$6,000,000 San Diego Association of Governments SANDAG 11-San Diego	Downtown San Diego at the intersection of Park Boulevard and Harbor Drive. The project provides grade separation for pedestrians, rail and vehicular traffic. The scope includes utility relocation, 550' pedestrian bridge, elevator, and open space plazas.  <u>Outcome/Output:</u> Improved pedestrian safety, fire/life safety response times, increased traffic circulation efficiency, and improved access to/from the waterfront and downtown area. The Park Boulevard to Harbor Drive connection will result in more efficient and direct travel patterns. Conversely, the lack of this connection results in an increase in out-of-direction traffic, additional travel times and resulting vehicle miles of travel. It is estimated that this important connection will reduce vehicle miles of travel on the local downtown roadway network by approximately 19,200 vehicle miles of travel per day, eliminating 18,000 pounds of carbon dioxide emissions and saving over 900 gallons of fuel daily.	<del>24279</del> <b>R987HA</b> 11-74211 \$6,000,000 CONST	2008-09 104-6063 HRCSA	\$6,000,000
